I'm a MERN Stack Developer with 1+ years of experience building scalable and responsive web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and MySQL. I also use CSS frameworks like Tailwind CSS and Bootstrap to create clean, user-friendly interfaces. I focus on writing maintainable code, optimizing performance, and continuously improving my full-stack development skills.

Experience

MERN Stack Developer | Mysticore InfoTech Pvt. Ltd | February 2026 - Present

- Working as a MERN Stack Developer, delivering end-to-end web solutions by handling both frontend and backend development.
- Developed scalable applications using React, Node.js, Express, and integrated databases such as MongoDB and MySQL.
- Implemented efficient form handling with Formik and optimized backend performance using MySQL Stored Procedures.

MERN Stack Developer | ShivAurica | September 2025 - January 2026

- Gained experience as a MERN Stack Developer, working on both frontend and backend development across various web projects.
- Actively working with HTML, CSS, JavaScript, React, Node.js, Express.js, MongoDB, and MySQL to build dynamic and efficient full-stack applications.
- Developing responsive and visually appealing user interfaces using Tailwind CSS, Bootstrap, Shadcn UI, and Framer Motion for enhanced user experiences.

MERN Stack Developer | Excelsior Technologies | January 2025 - September 2025

- Gained hands-on experience in HTML, Tailwind CSS, Bootstrap 5, and React.js, building responsive and dynamic user interfaces for web applications.
- Developed and maintained Full-stack projects using the MERN stack (MongoDB, Express.js, React.js, Node.js), and MySQL including API integration and backend logic with Node.js.
- Collaborated with the development team to understand full-stack workflows, database management, and authentication systems.

Education

Bachelor of Engineering (Computer)

2021- 2025

- Government Engineering College, Modasa (GTU) - 8.61 CGPA

Skills

- Dedication
- Teamwork
- Quick Learning
- Honesty
- Problem Solving
- Time Management

Languages, FrameWorks and Libraries

- HTML
- React Js
- MongoDB
- Bootstrap/Tailwind CSS Framework
- CSS/SCSS
- Node JS
- MySQL
- Redux
- JavaScript
- Express Js
- Next Js

Tools & Others

- Git
- Github
- Postman
- Ubuntu
- Windsurf
- Amazon Q
- Claude ai
- Antigravity
- Cursor

Project Summary

● Maheshwari Logistics ERP System (MLL)

- Developed and maintained a large-scale ERP platform for logistics and dispatch operations as a Full Stack Developer, building responsive UI with React.js and Material UI, developing backend services in Node.js using MVC architecture, and implementing complex forms with Formik to ensure smooth workflows and better user experience.
- **Tech Stack:** React.js, Material UI, Tailwind Css, Node.js, Express.js, MySQL, Stored Procedures, Formik, MVC Architecture

Goverdhan Thal

- Developed a restaurant-based web application with complete functionality for customers, instructors, and admins, contributing to frontend and admin panel design, implementing Rest APIS, and building key features like cart system, instructor panel and stock management while ensuring a responsive UI, optimized performance, and smooth user experience.
- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, MongoDB

Polls and Survey System

- Designed and developed a full-featured web application for creating polls and surveys, enabling users to participate, collect responses, and view real-time results with secure authentication, scalable architecture, and interactive data visualization for better user engagement and decision-making. Real-Time Result Analysis – Offered instant visualization of poll outcomes using dynamic result tracking and analytics, enhancing decision-making and user engagement.
- **Tech Stack:** React.js, Tailwind Css, Node.js, Express.js, MySQL
